

RemovalDesk

The complete guide to managing your removals business from one screen

Version 1.0

IMPORTANT: First Login & Account Setup

! Read this before anything else

RemovalDesk comes with a default admin account. You **MUST** update this with your own details before going live. Do not share the default credentials with anyone.

Default login credentials:

URL	https://[your-domain]/admin
Email	admin@yourbusiness.com
Password	RemovalDesk1

Setting up your account (do this first):

1. Log in using the default credentials above
2. A yellow banner will appear at the top of the screen saying **"Welcome! Please set up your admin account"**
3. Click **Set up my account**
4. Enter your real name, your email address, and choose a strong password
5. Click **Save my account**
6. Sign out and sign back in with your new email and password
7. The yellow banner will no longer appear — your account is now personalised

Tip: Write down your new password somewhere safe. If you lose it, you will need to restore from a backup to regain access.

Overview

The Admin Console is your central hub for running the entire business. It is designed to be used daily to manage customers, send quotes, organise staff, handle requests and track payments.

The main tabs across the top:

Tab	What it does
Customers	Full customer list, job cards, quotes and bookings
Diary	Visual calendar of all confirmed jobs
Requests	Pending packing and date change requests
Staff Rota	Shift management, crew assignment, flexible jobs
HR	Staff profiles, payroll, approvals
Storage	Storage container tracking
Archive	Completed and cancelled jobs

Customer List

The Customers tab shows all active jobs. Click any row to open the full job card.

- **Job Ref** — unique job number (e.g. #0001)
- **Customer** — name, email, phone, job type badge
- **Date** — move date (click to jump to diary)
- **Quote** — current status and amount
- **Booking** — stage (Enquiry, Quoted, Confirmed, etc.)
- **Payment** — Unpaid, Deposit paid, Paid in full

Job Cards

Click any customer to open their job card. Key tabs inside:

Quote Breakdown:

Enter costs, send quotes, issue revisions. A £50 minimum warning prevents accidental zero quotes.

Payments:

Confirm bank transfers, approve payment link requests

Date Changes:

Approve or decline customer date change requests

Service Requests:

Packing materials and service requests with auto-calculated costs

Messages:

Full chat thread — reply directly to the customer from here

Rota Info:

Set crew size and confirm the job for the rota

Sending Quotes

1. Open the job card, go to Quote Breakdown
2. Enter the removal service cost (other fields optional)
3. The total auto-calculates — or enter manually
4. Status auto-sets to "Sent" when you save with an amount
5. Click **Save** — customer receives their quote immediately

Staff Rota

1. Open job card → Rota Info → enter driver/porter count → Confirm
2. Go to Staff Rota tab → click the job date
3. Drag the job into Team A, B or C
4. Use dropdowns to assign specific staff members
5. Click **Post Shifts** — staff can now apply via their portal

Flexible Jobs panel (right side of Rota):

Shows material delivery/collection tasks and no-fixed-date jobs. Click A/B/C to assign to a crew on a chosen day.

HR & Staff Management

Adding a new staff member:

1. Go to HR tab → click + **Add Staff Member**
2. Enter name, email, phone and role (Driver/Porter/Class 2)
3. Save — then open their HR card to set a password
4. Click **Send Portal Invite + User Guide** to email them their login details and the staff user guide automatically

Staff are grouped in the HR tab by role: Admin → Class 2 Driver → Driver → Porter → Casual Staff.

Pricing Tab

Set the unit price for packing materials (small box, large box, tape, bubble wrap). These prices show to customers in real time when they request materials. Enter amounts and click **Save Prices**.

Requests Tab

The Requests tab shows all pending actions needing your approval. A badge shows the count. Check this every morning.

Packing material requests: Cost is auto-calculated. Adjust for a discount if needed, then click **Approve**. This adds to their invoice and notifies the customer.

Date change requests: Review their preferred/alternative dates and click **Approve** or **Decline**.

Daily Use Tips

Tip: Check Requests tab every morning — packing approvals update the customer invoice automatically.

Tip: The stats bar at the top updates live — Total Customers, Pending Quotes, Confirmed Moves, Payments Due.

Tip: Dates on job cards are clickable — tap a move date to jump to that day in the Diary.

Tip: When a quote is accepted, go to Rota Info immediately to plan the crew.

Tip: Use the Archive tab for completed/cancelled jobs — they stay in records but leave the main list.
